F O R E W O R D

Export marketing research is a subject of considerable interest to our Ministry, to Ontario manufacturers and to businessmen who may be interested in exports. The Foreign Market Studies which are undertaken by our Section, are written for the use of our Ministry and members of Ontario's foreign trade missions. These studies depict the economic background of the countries that will be visited. For this reason our Foreign Market Studies are, in the first instance, working documents designed for the use of the Ministry and cannot be taken in their entirety as expressing the opinion or position of the Ministry of Industry and Tourism.

Total imports (1971)	16 billion	15.6 billion
Imports per capita (1971)	\$296	\$743

INTRODUCTION

Italy with a population of 54.1 million people and a land area of 117,000 square miles is among the largest of the European countries. By 1980 the population is forecasted to exceed 58 million.

The term "economic miracle" has been applied frequently to the post war expansion of Italy. From an economy dependent upon agriculture, Italy's economy has developed into one now based primarily on industry and services. Italy has emerged as one of the world's major exporters of manufactured goods.

The growth of the Italian economy averaged close to 6% annually in real terms during the 1960's. However, this growth process began to slow down in 1970 and G.N.P. in that year grew by 5.1%, whilst 1971 saw an increase of only slightly over 1%.

Despite the progress that has been achieved, Italy is still the poorest member of the European Common Market. To a large extent this has been due to the uneven development of the country. The main concentration of wealth is in the industrialized northern part of the country where the standard of living compares favourably with that of other major western European countries. That of the south, while improving, still falls far below that of the north. Special attention has been paid to developing this southern area and during the past few years some industries have established new plants. Considerable expansion is planned in the south during the next five years by such major industries as the automotive, chemical and mechanical industries. The Government plans to continue new investment in this area. In part, this will be accomplished within the framework of the recently passed Mezzogiorno Development Bill.

Foreign investment in Italy is welcomed and encouraged through liberal treatment of foreign capital. It is particularly sought after for Southern Italy and Sicily and Sardinia. Foreign investment in Italy is estimated at approximately \$7 billion.

The share of the national economy owned and controlled by the State is larger in Italy than any other Western Country. Government control is exercised through two vast holding companies, the Institute for Industrial Reconstruction - I.R.I. - and The National Hydrocarbon Agency - E.N.I.

Foreign trade is an important factor in Italy's economy which is becoming increasingly dependent upon imports of raw materials for its industries. Italy's imports and exports are expanding each year but it has a chronic trade deficit and in 1970 this reached a high

\$1.7 billion. In 1971 the deficit was reduced to about half this amount. In 1971 Italy imported goods valued at \$16 billion and exported goods valued at \$15.1 billion. The deficit is covered in part by the substantial earning from tourism which is one of Italy's major industries.

The E.E.C. countries account for the majority of Italy's foreign trade, with West Germany being the principal single trading partner.

Canada is a minor trading partner of Italy accounting for only approximately 1% of Italy's imports and exports. Except for 1969, the balance of trade has been substantially in Canada's favour. In 1971 Canada's exports to Italy were valued at \$207.5 million and imports at \$157 million.

The intense investment expenditures Italy has planned for the modernization of many of its industries and infrastructures over the next few years, should present many opportunities for Canadian exporters, in spite of increasing competition from the European Community countries.

GENERAL INFORMATION

1. Geography and Climate

The Republic of Italy comprises Italy and the islands of Sicily and Sardinia. Italy, a boot shaped peninsular extending into the Mediterranean Sea, has a land area of 117,000 square miles. The Alps form a natural boundary to the north. The bordering countries are France, Switzerland, Austria and Yugoslavia. The peninsular coastline of nearly 2,600 miles borders the Adriatic Sea on the north-east, the Ionia Sea to the south and the Tyrrhenian to the west and northwest.

Italy may be divided into the following natural regions:

- a. The Alps
- b. The northern Italian plain
- c. The Appenines
- d. The narrow coastal plain along the Adriatic

The major river in Italy is the Po, which flows from west to east. There are numerous smaller rivers, important ones being the Arno and the Tiber.

Wide variations in latitude and altitude, along with the moderating effect of the Mediterranean, create climatic conditions in Italy which vary from temperate in the north to subtropical in the south. Milan has an annual average temperature of 55°F, Rome 60°F and Palermo in Sicily 63°F.

Rainfall varies quite markedly between north and south. It decreases progressively towards the south from the annual 50 inches in the Alps to 22 inches in Sicily. Sudden climatic changes throughout Italy result from the alternating of cool or cold north winds (tramonta) with the warm winds (sirocco) which originate in the Sahara.

Italy's population density is one of the highest in Europe with approximately 460 persons per square mile.

The major metropolitan centres are: Rome, the capital with 2.7 million inhabitants, Milan the major commercial and industrial centre 1.7 million, Naples 1.3 million and Turin 1.2 million. Genoa is the main port. Other principal centres are Palermo, Bologna, Florence, Catania, Bari, Venice, Trieste and Messina.

2. Human Resources

The population in Italy in 1971 was 54.1 million people. In 1961 the population was 50.6 million and it is estimated that by 1980 it will probably exceed 58 million. Of the total population about 14 million reside in the north-west, 20 million in the north-east and central Italy and 19 million in the south.

The rapid economic development in Italy during the past decade has considerably improved the Italian standard of living, and the per capita G.N.P. in 1970 was more than triple that of 1961 (\$540). There remains, however, wide disparities in income and standards of living between the industrialized north and the south or Mezzogiorno.

The standard of living in Italy's industrialized north compares favourably with that of West Germany, France and the U.K. In 1970 G.N.P. per capita was \$1745 for Italy as a whole, but the figure for the Mezzogiorno was only about three-fifths of the national average.

Italy's labor force in 1971 totaled 19.6 million or 36% of the population. The following table showing the distribution of the labor force in 1970 by sectors compared to 1960, shows that there has been a considerable shift in employment from agriculture to employment in industry and services during the past decade. This trend is continuing.

Distribution of Employment

	<u>January 1960</u>		<u>January 1970</u>	
	<u>'000</u>	<u>% of Total</u>	<u>'000</u>	<u>% of Total</u>

Source: The Economist Intelligence Unit

Italy's working population has declined gradually since 1961, after rapid growth in the 1950's. In 1961, the peak year, the labor force totaled 20.5 million. This decline resulted from the raising of the school-leaving age; the lowering of retirement age and the withdrawal of many women from the labor market in connection with migration from rural to urban areas. Since 1966, there has been considerable emigration of workers particularly to West Germany and the Netherlands and Switzerland.

In 1967, 229,000 Italians left to live and work in other countries and in 1969, 213,000. In 1971, 329,000 Italians emigrated.

Unemployment has declined steadily since 1966 when it was 3.9% to 3.1% in 1971. Unemployment remains a problem in the south.

The vast majority (90%) of Italians are Catholics. There are minorities of Protestants, Jews and Greek Orthodox. Education is compulsory and free between the ages of six and fourteen. There are over 40 universities and other institutions of higher learning. The three largest universities are located in Rome, Naples and Bologna. During 1969-1970 the University of Rome had an enrollment of 54,000 students.

3. Government and Constitution

In the June 1946 plebiscite, the Italian people voted to establish a Republic in place of the Constitutional Monarchy which had existed since the unification of Italy in 1870. The new constitution came into force in 1948. Legislation must be approved by both the Chamber of Deputies and the Senate, the members of which are elected by universal direct vote.

The Christian Democrats have been the core of all governments in Italy since World War II and the government normally consists of a delicate coalition based around this party. The Italian Communist party is the largest Communist party in Western Europe.

The Prime Minister presides over a Council of Ministers which he chooses and directs the general policy of government.

The President is the Head of State and is elected by Parliament for a seven-year term. In December 1971, Giovanni Leone was elected President, replacing Giuseppe Saragat.

The judiciary is an autonomous and independent arm of the state. The Constitutional Court has functions similar to those of the U.S. Supreme Court.

STRUCTURE OF THE ECONOMY

1. General

The Italian economy grew rapidly during the 1960's averaging close to 6% growth annually in real terms. Italy's G.N.P. nearly doubled during this period. In 1970 the G.N.P. grew by 5.1% compared to 5.9% in 1969. This still was within the growth rate provided for in Italy's development plan. However, in 1971 the G.N.P. grew by only about 1.4%.

Since the Second World War the economy of Italy has changed from one principally dependent on agriculture to one based mainly on industry and services.

Industrial activity is based mainly in the north especially in the triangle, Milan, Turin and Genoa. The southern part of Italy, known as the Mezzogiorno, is much less developed and special attention has been paid to promoting industry in this area. Initially this was through subsidies, special taxes and credit incentives and the occasional spectacular but isolated project such as an electricity generating station or mass integrated steel plant. Recently the tendency has been for a more selective approach. Special development areas have been created and large infrastructure investments made to improve communications and essential services. Overall responsibility for the economic development of the south lies with the planning body Comitato Interministeriale per la Programmazione Economica which replaces the Cassa per il Mezzogiorno. The latter organization now concentrates on specific major industrial, commercial and agricultural developments. It is estimated that public and private investment in the Mezzogiorno will exceed \$77 billion during the next ten years.

In 1967, the Italian Government instituted its First Development Plan 1966-70. Italy is now in its Second Development Plan 1971-75. Both plans are concerned with narrowing the differences in output and income between the north and south of Italy and between agriculture and industry, as well as improving Italy's competitive position in the trading world. They also recognize the need for broad social reforms as well as government administration changes.

The share of the national economy owned and controlled by the State in Italy is far larger than in any other Western industrial nation. Nearly all public services such as utilities, transportation and communications are government controlled as are the majority of banks, shipping and ship-building. Almost all the medium and small industrial enterprises are privately owned; only Fiat and Pirelli of the major industrial concerns are privately controlled.

Government control is exercised through two vast holding companies, the IRI - the Institute for Industrial Reconstruction and ENI - the National Hydrocarbon Agency. Both enterprises act as if they were effectively private corporations.

Major companies of the IRI are: Finsider (steel), Finmeccanica (Alfa Romeo cars, locomotive, mechanical and electro-mechanical products), Fincentiere (ship-building), Finmare (four major shipping lines) STET (telephone system); RAI (radio and T.V.) Alitalia (air transport); Autostrade (road construction) and three major banking chains.

The ENI group is composed of ASIP Mineravia (mineral and petroleum exploration); ANIC (refining and petro-chemical activities); SNAM (a construction and contracting company) and AGIP (gasoline stations).

2. Agriculture, Forestry and Fishing

A little over half the land in Italy is arable. In the Po valley, the soil is very fertile, but in the extensive tracts of hilly and mountainous country it is relatively barren, particularly in the south and in Sardinia. Agriculture now accounts for about 12% of G.N.P. compared to about 20% ten years ago. Agricultural productivity (output per person) increased 95% during the period 1962-71, from about \$1,020 in 1962 to \$1,994 in 1971.

In 1970, 3.5 million people or 19% of the labor force was engaged in agriculture. It is estimated that in 1975 agricultural employment will have declined to 2.5 million. Many of these agricultural workers left for better opportunities in industry or other European countries.

The distribution of land is characterized by a large number of very small farms.

The government has done much to try to improve the agricultural sector during the past twenty years. The land reform laws of 1950 and the Vanoi Plan of 1954 aimed at the redistribution of large estates to small holders. The Green Plan, supplementing this work, allotted over \$800 million between 1961 and 1965 for the improvement and continued rationalization of land holdings. A second Green Plan 1966-1970 emphasized expanding profitable sectors of production and increasing productivity. This plan aimed at achieving a uniform structure between Italian agriculture and that of other E.E.C. countries. More specific aims were to make small family farms more efficient, reorganize agricultural markets, develop livestock breeding and to improve the infrastructure in the farming sector with special emphasis on irrigation and land reclamation projects.

The major proportion of arable land is devoted to cereal crops: wheat, rice and corn. Italy is the leading rice producer in Europe. However, she is facing stiffer competition from the Far East and Latin America in exports of this product. Three contiguous provinces (Vercelli, Pavia and Novara) account for over 60% of Italian rice output. The 1970 rice crop was 817,000 tons. Over 50% was exported.

Fruit and vegetables are also grown extensively and large quantities exported particularly to other European countries. Temperate fruit is grown in the north and Campania, while citrus fruit comes predominantly from the south and Sicily.

Italy is a major producer of olive oil. Output in 1971 was about 560,000 tons compared to 424,000 in 1970. This accounted for about one-third of the world's output in 1971. Italy is also a major importer of this commodity.

Sugar beets and potatoes are other important crops.

Italy is among the world's leading producers and consumers of wines.

The following table shows the production of Italy's major crops for the years 1968-1970.

<u>Production of Main Crops 1968-1970</u> (000 tons)			
	<u>1968</u>	<u>1969</u>	<u>1970</u>
Wheat	9,655	9,585	9,630
Rye	75	71	66
Barley	258	292	315
Oats	390	491	486
Rice	648	862	817
Maize	3,990	4,519	4,729
Potatoes	3,960	3,970	3,668
Sugar Beet	11,457	10,571	9,557
Tomatoes	3,258	3,670	3,618

Olive oil	385	473	424
Oranges	1,407	1,423	1,446
Lemons	805	779	761
Apples	1,932	2,009	1,106

Source: Bank of Rome - January 1972

Italy's livestock population is limited and her dairy production under-developed. Large quantities of meat must be imported. In 1970, the livestock population of Italy included 7.9 million sheep; 338,000 horses; 9.8 million cattle; 5.5 million pigs and 110 million chickens.

In 1971, some 750,000 farms were equipped with at least one item of farm machinery, compared with 291,000 at the end of 1957. Approximately 65% of the agricultural machinery in use is located in Northern Italy. At the end of 1971 farm tractors numbered 657,000 combines 24,305, forage harvestors 348,807 and cultivators 189,420.

In recent years Italy has had increasingly large agricultural trade deficits - \$900 million in 1967 and \$1.4 billion in 1970. The U.S. supplies about 7% of Italy's food imports.

Despite its extensive coastline, Italy's waters are poorly stocked with fish, although Italy is noted for catches of mollusks, anchovies, sardines and shellfish. Domestic demand is met by imports, primarily from Denmark, Norway, Japan and Spain. Many of the fishing banks have been exhausted. Although legislation has done much to try to help the fishing industry, it remains on an individual level rather than an industrial structure.

Italy is also deficient in timber and forest products and imports extensively, primarily from Austria and Sweden.

3. Mining

Italy is poor in mineral resources. Mining has a minor place in the Italian industrial structure accounting for only about 1% of the G.N.P.

Crude petroleum and natural gas production has increased since the Second World War with the discovery of petroleum and natural gas in the Po Valley and Adriatic Sea. Proven gas reserves in the off-shore areas in the Adriatic Sea are estimated in excess of 200 billion cubic metres. However, domestic production does not meet domestic requirements and Italy must import large quantities of gas and oil. In 1970, oil imports amounted to 112.1 million tons which met 95% of Italy's petroleum requirements. By 1980 imports of oil and gas are expected to reach 200 million tons and 100 billion cubic metres respectively.

Italy's Production of Natural Gas and Petroleum 1968-1971

	<u>Natural Gas</u> billion cubic metres	<u>Petroleum</u> million metric tons
1968	10.4	1.5
1969	11.9	1.5
1970	13.2	1.4
1971	N.A.	1.3

Source: U.N.Monthly Bulletin

Italy's output of iron ore declined slightly during the period 1965-1970. In 1970, production was 757,000 metric tons compared to 764,000 metric tons in 1969. Production meets less than 10% of the iron ore used by the steel industry.

Coal production has also been declining steadily. Coal deposits are small and output is of low quality. Coal production in 1970 was 295,000 metric tons compared to 303,000 metric tons in 1969. In 1971 coal production declined to 240,000 metric tons. Domestic production meets only about 10% of domestic coal requirements. In 1970 coal imports reached 13 million tons, up 8% from 1969. The U.S. is an important supplier as are the E.E.C. countries, the Eastern European countries and Japan.

There are rich mercury mines near Sienna, and Italy is one of the world's largest producers of mercury outside the U.S.S.R. Italy accounts for about 20% of the world's output.

There are some workable reserves of bauxite, mainly in the Abruzzi, Campania and Apulia, and Sardinia produces lead and zinc. Building stone and marble are abundant. An extensive search for copper ores is now underway in Sardinia.

Although Sicily has Europe's only large sulphur deposits, extraction is uneconomical. During the past twenty-five years the European Community has aided Sicily in its attempts to modernize its sulphur mining and to increase its competitiveness. This assistance has now been ended and many mines are now in the process of being closed down. In 1971 sulphur ore output was 574,000 metric tons compared to 1.3 million metric tons in 1960.

Mineral Production
('000 met tons)

	<u>1965</u>	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>

Coal	389	418	410	365	303	295

Source: The Economist Intelligence Unit

4. Industry

Despite the lack of natural resources, Italy is among the world's leading industrial countries. Manufacturing accounts for the major part of the gross output of industrial activity and also contributes the major proportion of exports. In 1970 industrial production as a whole increased 6.5% compared to 3.3% in 1969. However, in 1971, there was little or no growth in this sector.

Manufacturing industries, particularly the steel, mechanical, chemical and textile industries, are concentrated in the north especially around Turin, Genoa and Milan. Lombardy and Piedmont employs over 40% of the industrial workers but has only 20% of the population. Under the programmes of the Cassa per il Mezzogiorno some industries have established new plants in the south. The chemical, automotive and mechanical industries are expected to expand considerably in this area during the next five years.

Italian industry is characterized by a large proportion of very small production units. 95% of Italy's industrial establishments employ ten or fewer people. Some 28% of the work force is employed by these firms. Italy does possess however, five of the top one hundred companies in the non-communist world. These are Montecatini-Edison (electrical engineering, chemicals, mining), Fiat (automobiles), Pirelli (rubber and cables) and the state owned E.N.I. (petroleum and natural gas) and Finsider (steel). Other large concerns are Olivetti, Snia Viscosa and Alfa Romeo.

Thus in spite of the high overall proportion of small firms, in several branches of industry a single firm may account for a large share (80%) of output.

The mechanical and equipment sector, accounts for the largest share of total gross output in Italy's manufacturing industry. This sector includes production of motor vehicles, ships, aircraft, locomotives, sewing machines, typewriters, calculating machines and cash registers, machine tools and machinery for the printing, paper and textile industries, as well as agricultural and electrical machinery. Mechanical engineering accounts for 25% of gross output and transportation equipment 6% of the mechanical and equipment sector.

Motor Vehicle Industry

Italian motor vehicle production has increased about four times during the past ten years, and in 1971 Italy was the fifth largest manufacturer of cars in the world after the U.S., Japan, Germany and France. In 1971, the Italian motor vehicle industry produced 1.8 million vehicles (1.7 million cars and 110,000 commercial vehicles). This was a 2% decline in production from 1970.

Exports however were higher, increasing 1.4% to a total of 680,516 vehicles. Exports represented 38% of total output in 1971 and 36% in 1970. The main markets were Germany (29%), France, the United States and the U.K.

The 1.1% decline in car production in 1971 was related to labour disputes, while truck output was adversely affected by a slump in domestic demand. In 1972 automobile production is expected to increase by 7%.

Automobile imports are increasing in Italy and in 1971 accounted for 26% of the domestic market. This reflects the industries decision to give priority to export markets. Until three years ago the Italian domestic market belonged almost exclusively to Italy's two major producers, Fiat and Alfa Romeo.

Motor Vehicle Production in Italy 1967-1971

000's

	<u>Cars</u>	<u>Commercial</u>
1967	1,439	103
1968	1,544	119
1969	1,477	118
1970	1,719	135
1971	1,700	110

Source: United Nations Monthly Bulletin

Fiat is responsible for over 80% of motor vehicle production in Italy. Further investment is being undertaken by Fiat, but due to congestion in the north where it is now located, expansion plans are being carried out in southern Italy.

Domestic Appliance Industry

The future of the Italian appliance industry is dependent upon maintaining and expanding its foreign markets as the domestic market has reached a comparatively high degree of saturation. In 1971 domestic sales of household appliances declined. It is estimated 65% of all Italian families have a washing machine, 75% have an electric or gas stove and 85% a refrigerator. The industry is looking to the Eastern European countries for its major marketing efforts in the future.

In 1971 the value of appliance production increased 5% to \$787 million. Exports increased 16% to \$610 million. In 1970 Italian domestic appliance production included 5.2 million refrigerators, 2.7 million washers, 472,000 freezers, 485,000 dishwashers, 940,000 vacuum cleaners and floor polishers. (Source: National Association of Electrical Industries.) The total value of the industry's output in 1970 was over \$700 million.

Following a series of mergers and acquisitions the industry is now dominated by two groups, Zanussi and Ignis, both of which have strong connections with major European companies; Ignis with Philip of the Netherlands and Zanussi with A.E.G. Telefunken of Germany. Zanussi is the largest producer but most of its products are sold abroad under the trademarks of other well-known companies.

Steel Industry

Italy is the fourth largest steel producer in Western Europe after West Germany, France and the U.K. and the seventh largest steel producing country in the world. After Japan, Italy is the country which since the Second World War has accomplished the most rapid progress in steel production and consumption. Between 1958 and 1968 Italy's steel production increased by approximately 10% per annum.

In 1971 Italy's steel production was 17.4 million metric tons compared to 17.2 million metric tons in 1970 and 16.4 million metric tons in 1969. Production in 1969, however, was not as high as anticipated due to strike activity. Italy plans to increase her output of crude steel to 24.5 metric million tons in 1974 and 30 metric million tons in 1980.

In 1971 pig iron production increased to 8.5 million metric tons, from 8.3 million tons in 1970 and production of hot rolled steel products increased to 14 million metric tons from 13.9 million. Production of ferroalloys decreased to 190,000 metric tons from 197,000 metric tons in 1970.

A large part of Italian steel production is in the hands of Finsider, a holding company of the State-controlled I.R.I. The group companies of Finsider account for over 56% of Italy's steel production and this proportion is expected to reach over 70% when current expansion programmes are completed. A major part of Finsider's investment plans is the expansion of the Taranto iron and steel centre from a current capacity of 3.3 million tons to 10.7 million tons.

Also planned is an iron and steel complex at Gioia Tauro at the southern tip of Italy which when completed will be Italy's fifth fully integrated iron and steel plant and one of the largest in the world. Planned capacity is 10 million tons per year.

In 1971, Italy's steel consumption fell to 17.7 million tons from 20.2 million tons in 1970 reflecting the slump in construction and automobile industry. 1972 consumption is forecast for 18-19 million tons. Italy's steel consumption is expected to be 25 million tons by 1975 and 30 million by 1980.

Chemical Industry

Italy is one of Western Europe's important chemical producers. This industry is one of the most rapidly expanding in the Italian economy, with growth maintained through expanding exports, as domestic demand is declining. The chemical industry, including petroleum and coal processing, accounted for 14% of output of the manufacturing industry in 1969. The growth of the chemical industry in the 1960's was subsidized to a large extent by the government. The Italian chemical industry is planning to triple production throughout the 1970's to about \$20 billion a year and State subsidies will continue to provide a large percentage of capital needs for expansion.

About 25% of Italian chemical production is controlled by Montedison.

Textile Industry

Italy's textile industry is currently facing problems of rising costs, falling production, foreign competition and structural deficiencies. The industry appears to be evolving from a relatively low-cost producer into a comparatively high-cost producer. Italy's textile industry is now concerned with problems that its competitors the U.S., the U.K. and France have been preoccupied with for years - the need for rationalization, concentration and specialization. The government is looking into ways to assist the textile industry. The industry is composed principally of small family firms which lack the capital for modernization.

Other Industries

In recent years there have been significant increases in Italy's food and beverages industries especially as far as sugar extracts, dietetic foods, cheese and edible oils are concerned.

In 1970 and 1971 Italy's building industry suffered from stagnation. Building starts dropped off considerably, whereas completed buildings picked up slightly.

The following tables show the change in Italy's manufacturing sectors between 1963 and 1970 and production of selected industrial items.

Indices of Italy's Industrial Production 1963 = 100

	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>

5. Public Utilities

Energy

In 1970 the Italian energy requirements were met as follows: oil 79%, hydro, nuclear power 8%, solid fuels 6% and natural gas 7%.

Oil requirements are met mostly through imports. Imports have increased steadily during the past five years and in 1970 amounted to 112.1 million tons.

Production of natural gas has increased during the past few years but to meet the rising demand and to conserve domestic reserves - about 12 years consumption at present rates-E.N.I. has entered into import agreements with Libya, the Netherlands and the U.S.S.R. A new pipeline is being built to link the Soviet and Czechoslovakian networks with the Italian one. In 1970 natural gas consumption in Italy amounted to about 11,000 million cubic metres of gas. Production amounted to 13 million cubic metres in the same year.

Electrical power in Italy is nationalized under the control of the National Electrical Power Agency (ENEL). Electricity production has increased steadily since 1964. In 1971 electricity production was 122 billion kwh, compared to 114 billion kwh in 1970 and 110 billion kwh in 1969. ENEL supplies approximately 70% of the national electrical power requirements. About 60% of Italy's electrical output is from hydroelectric sources, but these are now fully exploited and increased demand in recent years has been supplied by thermal installations. Italy is one of the largest users of nuclear power in the world after the U.S. and the U.K. Italy has three nuclear power stations at present and proposes to build a new nuclear power station every year for the next ten years.

Production of Fuel and Power ('000 metric tons, unless stated)

	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>

Transportation

About 80% of Italy's railways are nationalized and operated by the State agency Ferrovie de Stato. The rest are operated privately under government concession. Approximately one half of the 13,500 miles of track is electrified. The railways are in the process of being modernized during the next five years with the government planning to spend over \$500 million. In 1970 work was begun on a new high-speed line between Florence and Rome. In 1970 the number of passenger miles totaled 329 million and freight amounted to 55 million-ton-miles.

The major proportion of all land freight and passenger traffic in Italy is carried by road. Italy is second only to West Germany with regards to length of superhighways and by 1975 Italy expects to have the largest network of highways in Europe. Highways now cover 2,400 miles and will extend to over 4,350 miles in 1975. Construction and management of all Italian highways is controlled by the Autostrade Co., a firm controlled by the I.R.I.

In 1970 there were 10.2 million motor cars in Italy, about 875,000 trucks and 33,000 motor buses. There were also about 2.3 million motor scooters and motor cycles. In 1970 there was one car for every five inhabitants compared to one for every 137 inhabitants in 1950. In 1971 there were 11.4 million cars, 935,000 trucks, 40,000 buses, 3.3 million motor scooters and cycles.

Italy's inland waterway system is located mainly in the north and totals 1,637 miles. It is made up of the Po River, the Italian lakes and lagoons and the network of Venetian and Po Valley canals. Italy's long coastline and many ports have favoured the growth of coastal shipping.

Genoa and Venice in Northern Italy are important ports, handling the majority of traffic from the industrial centres in that area. Since 1969 Genoa has been equipped to handle container traffic. The port of Naples, second only to Genoa in activity, is the principal port for central and southern Italy. Other important ports include Bagnoli, Ancona, Bari, Ravenna and Trieste.

Italian ports' commerce has increased from 45 million tons in 1951 to 330 million tons in 1970. Italy plans to invest over \$750 million in port improvements between 1971 and 1975. This investment will be concentrated on a few selected ports. These plans assume a commerce of 600 million tons in 1976 and 900 million tons in 1980.

In 1971 the Italian merchant fleet totaled 8 million g.r.t. making it the eighth largest in the world. It is expected to increase 50% by 1975.

Italy has many airports but Rome's Ciampino and Milan's Malpensa handle the bulk of international traffic. The national airline Alitalia is controlled by the government and together with three other airlines provides domestic service. Being long and mountainous Italy is naturally suited for a well developed internal air-service. Operations are being expanded emphasizing better connections between north and south and between the mainland and Sicily and Sardinia. There is considerable activity in airport construction and improvements and new airports are being planned for Florence, Naples and Agrigento.

Communications

Italian television and radio is well developed. It is operated by Radio Television Italiana, a government controlled body. At the end of 1970 there were 9.7 million registered T.V. sets and radio sets numbered 11.5 million. In 1971, there were 10.3 million registered T.V. sets.

The telephone system is controlled by the Societa Finanziaria Telefonica a government owned holding company operating through five subsidiaries. In 1970, there were over 8.8 million telephones in Italy. In 1971 there were 10.3 million telephones in service.

6. Tourism

Tourist spending is a vital source of foreign currency for Italy and tourism has become one of Italy's largest industries. The substantial tourist receipts are used to cover the visible trade deficit. During the past two decades tourist growth has been spectacular increasing from 3.4 million in 1949 to approximately 32 million in 1969. In 1971 net earnings from tourist spending in Italy totaled approximately \$1.1 billion an increase of 14.6% over 1970. Previously tourists came from a relatively limited number of countries and concentrated in certain specific areas: Rome, Florence, Venice, Milan. To-day every nation is represented and they travel all over the country.

In 1971, Italian tourists abroad spent about \$901 million up 15.6% from 1970.

7. Banking

The Bank of Italy is the central bank. It is the only bank of issue and exercises powerful functions with respect to credit controls.

The Bank of Italy is entrusted with the supervisions of the commercial banks, and the Ministry of Finance is responsible for implementing policies related to the other financial institutions.

The Italian commercial banking sector may be divided into several categories.

- (a) Banks of National Interest - these are the Banca Commerciale Italiana, Credito Italiano and Banco di Roma. They handle the bulk of foreign exchange transactions. The three banks are principally owned by IRI but nevertheless operated independently of each other.
- (b) Banks of Public Law - these are the Banco de Napoli, Banco di Sicilia, Banca Nazionale del Lavoro, Banco di Sardegna, Istituto Bancario San Paolo di Torino and Monte dei Paschi di Siena, which are all publicly owned.
- (c) The private commercial banks, savings banks, co-operative banks and rural institutions.

The Istituto Mobiliare Italiano (IMI), a public agency, is the largest Italian credit organization, and its loans account for nearly half of those granted to industry on extended terms.

The principal banks in the medium credit field are Mediobanc, Efibanca, and Centrobanca.

Recently, Italian banks have become more internationally orientated. At the end of 1970, eleven Italian banks were operating abroad.

FOREIGN TRADE

Structure of Foreign Trade

The structure of Italy's foreign trade shows an ever growing tendency toward the export of industrial products and an increasing dependence upon imports of raw materials for its industries and upon food imports. Italy's foreign trade accounts for approximately one-third of the G.N.P.

Italy's imports and exports have grown steadily during the past five years and in 1971 they showed an increase of 62% and 73% respectively over 1967. During this period Italy continuously showed a trade deficit which in 1970 amounted to a high \$1.7 billion.

In 1971 Italy's imports amounted to \$16 billion, an increase of 6.8% over 1970. Exports increased 14.3% to \$15.1 billion. In 1971, the trade deficit was reduced by half to \$857 million.

In 1971, imports were less than anticipated with the imports of raw and semi-finished materials especially affected due to the slow down in the domestic economy. With domestic consumption down, Italian producers looked to foreign markets for their products.

The following table shows the trend of Italy's trade during the past years.

<u>Trade of Italy 1967-1971</u>					
\$ million					
	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>	<u>1971</u>
Imports	9,827	10,286	12,467	14,939	15,953
Exports	8,706	10,185	11,728	13,210	15,096
Balance	-1,121	-101	-739	-1,729	-857

Source: International Monetary Fund

Italy's partners in the Common Market are her largest trading partners providing 42.4% of Italian imports and taking 44.6% of Italian exports in 1971 compared to 22% and 24% in 1958.

West Germany is Italy's largest single trading partner followed by France and the U.S. Other important countries are the U.K., Yugoslavia, Switzerland and Libya. Canada accounts for around 1% of Italy's imports and exports. Italy is seeking to expand its trade with the Eastern European nations.

Imports and Exports of Italy

Italy's principal imports include mineral fuels, machinery and equipment, chemicals, oil seeds, frozen meat, rough cut wood, laminated steel and iron and copper and alloys, cotton and wool.

In 1971 Italy's imports were valued at \$16 billion.

Italy's Imports by Commodity Groups 1971

	<u>% of total imports 1971</u>	<u>% change over 1970</u>
Crude petroleum	14.2	+26
Machinery and equipment	11.4	+ 6
Chemical products	8.4	+ 3
Steel products	4.7	-21
Motor vehicles	3.8	+10
Grains	3.5	+29
Meat	3.5	+23
Cattle	3.1	+24

Source: Italian Trade Topics: April 1972

In 1971, imports of copper and alloys, lumber, raw cotton, raw wool and cellulose were among products showing a decrease.

The bulk of Italy's exports consist of capital and consumer goods. Important in this respect are machinery and equipment, automobiles, office machinery and textiles and clothing.

In 1971, the value of Italy's exports was \$15.1 billion.

Italy's Exports by Commodity Groups 1971

	<u>% of total exports 1971</u>	<u>% change over 1970</u>
Machinery and equipment	19.9	+ 8
Chemical products	7.0	+15
Motor vehicles	6.6	+17
Refined petroleum products	5.3	+23
Steel products	4.1	+47
Fruit and vegetable	3.4	-
Precision mechanical products	3.1	+11

CANADIAN TRADE WITH ITALY

1. General

Canada and Italy exchange most favoured nation treatment under the provisions of G.A.T.T.

In 1971 Canada exported goods worth \$207 million to Italy. This was a substantial increase of 12.5% over the \$184 million exported in 1970. In 1971, Canadian imports from Italy amounted to \$157 million an 8.3% increase over 1970. During the past six years Canadian imports from Italy have risen steadily, while exports have fluctuated. With the exception of 1969, the balance of trade has been in Canada's favour during this period.

Canadian-Italian Trade 1966-1971

	<u>Canadian Imports</u> \$ million	<u>Canadian Exports</u> \$ million	<u>Balance</u>
1966	87	115	+28
1967	110	141	+31
1968	114	131	+17
1969	141	134	- 7
1970	145	184	+39
1971	157	207	+50

2. Canadian Exports to Italy

Canada's exports to Italy fall within three major categories: foods, metals and ores, and forestry. Main products exported include: wheat, barley, rapeseed, iron ore agglomerated, asbestos, lumber, wood pulp, aluminum and nickel.

Canada's exports to Italy in 1971 increased a substantial 12.5% over 1970. This rise was accounted for to a large extent by large increases in the exports of wheat, barley and rapeseed.

Principal Canadian Exports to Italy 1969-1971

	\$ million		
	1969	1970	1971
Barley	-	23.0	36.8
Wheat, except seed n.e.s.	17.3	17.7	33.7
Flaxseed	0.5	1.4	1.6
Rapeseed	0.3	4.0	12.2
Iron ore, agglomerated	8.4	17.5	15.7
Aluminum and aluminum alloy scrap	4.5	3.8	1.9
Molybdenum in ores, concentrates and scraps	1.7	1.6	1.6
Asbestos	3.8	3.7	3.0
Lumber, Douglas fir and hemlock	7.2	4.8	3.7
Wood pulp	23.9	31.8	30.0
Liner board	2.6	3.0	.5
Pig iron	3.6	3.3	3.5
Aluminum pig ingots shot slabs	6.0	7.6	3.8
Copper, refinery shapes	2.3	5.5	8.6
Nickel anodes, cathodes, ingots, rods	4.0	4.2	6.2

Source: Statistics Canada, 1971

3. Canadian Imports from Italy

Canada imported products from Italy to the value of \$157 million in 1971. The major imports included: automobiles, refrigerators, boots and shoes, calculating machines and parts, and knitted suits and dresses.

Principal Canadian Imports from Italy 1969-1971

	\$ million		
	1969	1970	1971
Cheese	2.0	2.0	2.1
Cherries	1.5	1.3	1.3
Vermouth	2.4	1.9	2.4
Wines, still	1.7	1.7	2.6

Ontario Domestic Exports to Italy

In 1970 Ontario exported goods worth \$23.9 million an increase of 50% over the \$15.9 million in 1969. This represented 13% of the Canadian total to Italy in 1970. In 1971 Ontario exports to Italy decreased slightly to \$22.3 million representing 11% of total Canadian exports to this country. In 1971, principal Ontario exports to Italy included cereals, unmilled, copper and alloys, wood pulp and similar pulp; zinc in ores, concentrates and scraps; and office machines and equipment. The following table shows the values of these exports in 1970 and 1971.

Principal Ontario Exports to Italy ('000)

	<u>1970</u>	<u>1971</u>
Cereals, unmilled	1,057.1	2,118.6
Oil seeds, oil nuts and oil kernels	1,005.1	1,729.4
Zinc in Ores, Concentrates and Scrap	742.7	1,633.6
Wood pulp and similar pulp	2,037.5	1,681.0
Copper and alloys	3,861.9	4,385.1
Office machines and equipment	1,072.2	1,843.5

Source: Ontario Exports by Countries

4. Market Potential for Canadian Exports

The Italian Market is highly competitive. Nevertheless the Italian Market offers attractive opportunities for Canadian exporters.

There is general awareness that Italy's industries need modernizing if it is to meet effectively the challenge of growing competition from other countries. Therefore, top consideration is being given to automation, standardization and specialization in key industries.

There appear to be good prospects for exporters of highway construction machinery and meat processing equipment.

There would also appear to be a good potential for sales of automatic and semi-automatic warehousing equipment, special conveyor belts, sorting and picking equipment, cranes, elevators and special forklift trucks.

Container handling equipment in general, offers a promising market in the near future, particularly for onboard and dockside cranes, side-loaders, straddle carriers, swinglifts, hydraulic container jacks and container manufacturing equipment.

There is probably also a good potential in Italy for exports of biomedical equipment - especially advanced equipment for diagnosis and research - and for water control and anti-pollution equipment.

There appears to be good long-term potential for sales of electronic and electronic measuring instruments such as oscilloscopes with memory, integrated circuits, production test equipment for transistors, electronic scanners, oceanlog-digital recorders. The market for data processing equipment continues strong.

Opportunities also exist for sales of technologically advanced photographic equipment, particularly optical processing equipment, and equipment for the production and finishing of lenses.

Separation equipment and all types of sorters appear to be in increasing demand and products such as hammer mills, metal recovery furnaces, magnetic and vibro-separators, separation and conversion systems and cable stripping machines should offer good sales opportunities.

Sophisticated optical equipment such as spectrometers, colorimeters and lazer devices should continue to have good sales prospects.

There is also a good market in Italy for nuclear equipment.

Appearance and style are often decisive factors in the buying decisions of Italian consumers.

Rising per capita income is producing shifts in patterns of consumer demand and buying habits. Sales of meat, frozen foods and processed and packaged goods are benefitting from this phenomenon, as are leisure and recreation goods. Food vending machines are becoming increasingly popular.

ITALIAN ECONOMIC AND TRADE POLICY

1. Trade Policy

Immediately after the Second World War most imports into Italy needed a license with payment being carried out according to payment agreements or in convertible currencies. To-day most imports are admitted without a license.

In 1950, Italy embarked upon a policy of import liberalization. To-day, except for raw materials which are nearly all admitted duty free, imports of most industrial products from non-EEC countries are dutiable at rates ranging from 4% to 20%. Italy is one of the six members of the EEC and imposes no import duties on non-agricultural products from member states.

Italy imposes an equalization import tax commensurate with the sales tax paid during the manufacturing process of similar items made in Italy. There is a small customs charge on all import transactions.

2. Foreign Investment

Foreign investment in Italy is welcomed and in fact encouraged through liberal treatment of foreign capital as well as tax and credit incentives. Except for a few fields where the government has a monopoly there are no limits on the types of business a foreigner may establish in Italy. Capital is particularly sought after for southern Italy and Sicily and Sardinia. Italy does not have a tax agreement with Canada.

Italy's free policies with regard to foreign investment along with her expanding economy and location within the common market have made her successful in attracting foreign capital.

During the last 10 years nearly \$1 billion in foreign funds has been invested in Italy. Total foreign investment in Italy is estimated at about \$7 billion. 1970 foreign investment totaled \$93 million an increase of 74% over 1969. The largest proportion of these investments was in the oil industry, but other sectors include chemical, foodstuffs, mechanical engineering and metal industries.

The U.S. has been the leading investor in Italy during the past 10 years. At the end of 1970 U.S. direct investment in Italy totaled about \$1.3 billion. Other major investors are Switzerland, France and West Germany.

Companies designated as productive enterprises are guaranteed unlimited remittance of earnings and repatriation of capital at the official exchange rate.

Application for designation as productive enterprises may be submitted to the Treasury before the investment is made. If a negative answer is not received within 30 days the silence amounts to approval.

The Italian form of business organization most suited to foreign investors is the Societa per Azioni (SPA) or corporation. Foreign businessmen can also establish a limited liability company (Societa a Responsabilita Limitata - SARL).

Although the lira is externally convertible, a variety of controls apply to transfers of Italian funds abroad. These are not generally burdensome in day to day business operations.

3. Patents and Trademarks

Italy is a member of the Paris Convention on Industrial property, and of the Madrid Arrangement for the International Registration of Trademarks.

Industrial patents in Italy are issued for a period of fifteen years without prior examination as to the merit and novelty of the invention. The burden of nullifying a patent rests solely with the challenger of its validity.

As for trademarks, Italian law does not prescribe compulsory registration and an unregistered trademark can be legally defended. This automatic protection is incomplete, however. A trademark may be registered for 20 years initially and renewed for another 20 years. A trademark once registered may be forfeited only if the markholder has made no effort to stop infringers, or if the trademark is not used within three years of registration, or if its use is discontinued for three years without valid reason.

4. Licensing

There is no approval mechanism for licensing agreements as such, but transfers abroad of royalties and fees are subject to exchange control regulations.

Royalty and fee patterns are determined by commercial considerations rather than government controls.

5. Retailing in Italy

Italian retailing is slowly moving to a situation characterized by:

1. An increasing number of new and larger retailing units, a widespread acceptance of supermarkets and variety stores, and a gradual increase in the number of department stores and mail order houses.
2. A gradual abandoning of the "street-corner shop" and a slowdown in the rate of increase in the number of specialized "food shops".

6. Agency Agreements

The principal-agent relation is governed by provisions of the Civil Code and Law 562.

Definite term agreements terminate on the expiration of the agreement. Notice is not needed.

An agreement may be terminated at any time for just cause and by giving notice of termination. Failure to give notice when required makes the principal liable to pay compensation.

7. Tariffs

Italy, traditionally a high tariff country for imports of finished and semi-finished goods has reduced most duties to the common outer tariff of the E.E.C. which is now in effect.

ONTARIO DOMESTIC EXPORTS TO ITALY BY COMMODITIES
1970 - 1971

TABLE I

COMMODITIES	Value \$'000	
	1970	1971
Cattle	498.0	596.5
